1 planner the school put together. Each child in middle school had to pay \$2 for this planner, which  
2 was a notebook with the school's name on it and with materials the school required kids to have  
3 inside. Two dollars may not seem like a big deal, but what if someone didn't have \$2 to spare? Then  
4 what would the student do, given that the school required each student to buy the planner?

5 9. I don't understand why, if the school is short on textbooks and instructional materials,  
6 the district is out buying more property to accommodate preschool kids. The district should  
7 concentrate on the kids who are required to go to school and make sure that those kids have all the  
8 materials they need. Berry Creek is the lowest performing school academically in our county, and  
9 we need to be sure that our kids have the materials they need so we can turn that performance  
10 statistic around.

11 10. The school has two bathrooms for girls and two bathrooms for boys, and there are 172  
12 kids attending the school. Each of the bathrooms has three stalls. Three combined K-2 classes, each  
13 with 20 to 25 students, and one combined third through fifth grade class, with 30 students, share the  
14 one girls' bathrooms and one boys' bathrooms in the inside of the building. The Kindergarteners do  
15 not have their own bathroom. Also, a lot of times the bathrooms have no toilet paper and no paper  
16 towels.

17 I declare under penalty of perjury under the laws of the United States and the State of  
18 California that the foregoing is true and correct. Executed on August 18, 2000 at Berry Creek,  
19 California.
